SUBJECT INDEX

Abelian group	characterization
locally compact – $390f$	- of generators
solenoidal - 391	122ff, 247ff, 260ff, 370ff
abscissa	chain rule 136
– of absolute convergence 103f	closable 5f, 52, 120
– of simple convergence 103	closure 5f, 52, 120
– of holomorphy 101	cocycle 148ff
absolute value 235, 239	cone
abstract Cauchy problem	positive – 51, 234, 369
4, 26ff, 95ff, 336	conditional expectation
adjoint 16f, 400	normal - 411f, 416
– generator 17f	core 5f, 46
- operator 16, 64f, 77, 141	cyclic 169, 172ff, 192ff,
– semigroup 16ff	302ff, 305, 379ff, 388ff
admissible function 154ff	imaginary additively –
algebra homomorphism 143ff	172ff, 192ff, 302ff
algebraic multiplicity 73	
AI-space 239	
AM-space 239	
approximation theorems	
32f, 44, 81, 116	
asymptotics	Datko's theorem 108f
98ff, 204ff, 342ff, 362, 406ff	decomposition 66ff, 325ff, 351ff
automorphism group 146ff	delay
	- differential equation 219ff
	- equation 350ff
	$\frac{1}{\text{derivation } 143ff}$
Banach lattice 235	derivative
complex - 243, 260, 288	first order – 8ff, 146, 184f,
real - 243	220, 265, 276, 308f, 357
band 236	higher order – 26%
- projection 237	second order – 11f, 34f, 179,
boundary spectrum 169ff,	185, 249f, 308f
286ff, 302ff, 305, 379ff, 387	differential equation
	homogeneous – 4, 98f
	inhomogeneous – 112ff, 340ff
C*-algebra 117, 369	ordinary – 152 f , 197 f , 219 f f
Calkin algebra 73	partial - 26
Cauchy problem 4, 26ff	retarded - 134f, 142, 178f, 219f
abstract - 4, 26ff, 98ff, 336	system of -365
autonomous -4 , $26ff$	differential operator 8ff, 111ff,
homogeneous -4 , 98ff	34f, 146, 179, 185, 220, 258f,
inhomogeneous – $112ff$, $340ff$	265, 267f, 276, 308f, 357
retarded – 219ff, 356ff	disjointness preserving
well-posed $-26ff$	operator 291
center 246, 272, 279f, 289	- semigroup 291ff
Cesàro	dispersive 249ff
- mean 346, 406, 408	strictly – 249ff
- summable 93f	dissipative 47ff
Chapman-Kolmogorov equation 213f	p- 48ff, 120ff
characteristic equation 180, 220, 382	p = 40ff strictly $-49ff$
generalized = 996, 969	Doeblin's condition 970 3/3

	Fredholm – $73f$
	domain of uniqueness $49f$
dominant spectral value	Gateaux-derivative 50, 136, 257, 283
177ff, 304, 318ff	generalized solution 99, 112
strictly -	generator 3ff
177ff, 210, 217, 318ff	adjoint - 16
domination 269ff, 371	bounded - 9, 7, 54ff, 129, 247,
dual 16	255, 288, 376ff
semigroup – 16f	$\frac{266}{266}, \frac{266}{6}, \frac{276}{6}$ weak - 16
Dunford-Pettis property 56	geometric multiplicity 73
Dumord-rectis property 50	graph 5
	graph norm 5
	Grothendieck space 55ff
eigenspace 64, 86	group 1, 6, 9, 34, 66, 146ff,
eigenvalue 64, 337	326f, 352ff, 390f
approximate – 64 , 314	automorphism - 146ff
simple – 73 , 305 , 310 , 330	lattice homomorphism 202
normalized – 330	one-parameter $-1, 6, 31$
eigenvector 64, 337	positive – 146, 148ff, 295, 326f
approximate – 64 , 314	rotation - 10, 69, 352ff
elliptic differential operator	unitary - 13
185, 190f, 260, 305, 312	growth bound 2 , 6 , $60ff$
equation	- of a semigroup 2, 6, 60ff, 74,
$\frac{1}{1}$ differential -4	39ff, 130, 163, 204ff, 295,
heat - 13	334ff, 343, 400ff
population – 229, 344f, 354f, 364ff	of mild solutions of a Cauchy problem
retarded $-356ff$	98ff
transport - 308f, 320	of solutions of a Cauchy problem
example	98ff, 204ff, 336ff
counter -	essential -74 , 343
3, 61ff, 105, 131, 266ff, 311	essentiai = 14, 545
standard - 7ff, 9, 10, 11, 13,	
42ff, 100f, 134, 380, 416	
exponential estimate $2f$	
	1 1C 548 4088
	half-norm 51ff, 127ff
T	canonical - 51ff, 127ff, 265ff
F-product 20f, 298ff, 314ff	strict – 51ff, 127ff
F-product with respect to a semigroup	heat equation 13
20f, 74ff, 192	Hilbert space 13, 62, 94ff, 105, 403
face 336	Hille-Yosida theorem 32
invariant – 336 , 410	
faithful subset 380	
Fèjer's theorem 93f	
Feller property	ideal 236
strong - 213	algebraic - 116
fixed space 343ff, 374ff, 380ff, 414	closed - 110, 336
flow 143ff	invariant $-192ff$, 303, 306ff, 317
continuous – 146, 192ff, 330	lattice -236
semi – 143ff, 352ff	imaginary additively cyclic subset
seperately continuous – 148f	172ff, 192ff, 297
forcing term 112ff, 340ff	inhomogeneous differential equation
periodic – 116	112ff, 340ff
p-periodic – 113ff	integral equation 363
Fourier transformation 12f, 91, 252	interpolation 335 , 348 , 352

domain 3, 9, 49f

inverse - 13, 91 invariant coefficient 80 - ideals 192ff, 303, 306ff, 317 Fredholm - subset 24, 346 - domain 73firreducible 130ff, 256ff, 414 - operator 73f - semigroup 130, 192ff, 210, 306ff, 311ff, 315ff, 405ff W*- 369 Jordan decomposition 334, 389, 420 closed - 5fcontractive - 47ff densely defined – 4 differential - 8ff dissipative – 47ff Kakutani-Krein theorem 240, 297, dispersive 249ff 313, 334 elliptic – 185, 190f, 260, 305, 312 kernel - 104, 189f, 308ff, 320, Kato's equality 138ff, 285ff, 335f 349f, 363, 367 - inequality 139, 256ff, 258ff, 285 lattice - 120, 243 - classical - 138f, 258f local – 146f, 268f, 282, 287 distributional – Laplace - 13, 34f, 100, 110, 139, Krein-Rutman theorem 130, 167, 334 163, 185, 205, 250f, 258, 333 multiplication - 7f, 89f, 248, 287 positive – 120ff p-contractive – 48ff Laplace transform 101, 107 p-dissipative – 48ff, 128ff **Laplacian** 13, 34f, 100, 110, 139, resolvent positive – 127ff 163, 185, 205, 250f, 258, 333 Schrödinger – 179, 273, 278f, 336 lattice strictly dissipative – 48ff strictly p-dissipative - 48ff - homomorphism 120, 243, 244, 281 – norm *235* strictly dispersive 249ff locality 146f, 268f, 282, 287 weakly compact - 181, 211f long term behavior 98ff, 204ff, operator semigroup 1ff, 400 342ff, 352, 406ff weakly compact -406fLumer-Phillips theorem 53f order bounded 236 order - complete 234 - continuous norm 241 - interval 235 Markov order continuity 239, 286, 287ff algebra homomorphism 143ff order unit 236 - lattice homomorphism 120, weak - 238192ff, 200f ordered - operator 120, 181 - Banach space 234, 293 - process 213f - vector space 234 - semigroup 144, 181 - transition function 213f, 347f matrix semigroup 7 maximum principle 165, 190 mild solution 99, 112 periodic modulus 136, 257, 285f, 381 - semigroup 10, 79ff, 85, 313, 416 multiplication p-periodic 113ff - operator 7f, 89f, 246 Perron-Frobenius theory 163ff, 172ff, - semigroup 7f, 42ff, 65f, 287ff 292ff, 298ff, 379ff multiplicity 73ff perturbation algebraic – 73f, 209, 310 additive – 43ff - as a pole *73* bounded – 44ff, 307

geometric - 73, 310

compact - 215f, 319

	multiplicative $-131ff$, 141
	perturbation by multiplication operators 179, 183, 188, 274ff, 279, 307
negative part 235	perturbation theorems 43ff
norm	Phillip's theorem 243
$\operatorname{graph} - 5$	polar decomposition 380, 392
Sobolev – 13ff	pole 67f, 72ff, 76, 209ff, 305, 315ff
normal linear functional 369	algebraically simple $-73f$,
	161, 185, 209ff, 218, 315ff
	– of order k 73f, 86, 174f,
	$295, \ 302ff$
operator	${ m simple}-73f,\ 209ff,\ 310,\ 315ff$
closable – $5f$	first order – 73f, 160
population equation 229ff, 344f,	Schwarz inequality 370
354f, 364ff	Schwartz space 12, 250
positive part 235	self-adjoint part 369
positive minimum principle	semiflow 143ff, 352ff
165ff, 133ff, 253ff, 368	continuous - 144ff, 192
positive subeigenvector 261	injective – 193
positivity 119, 119, 120,	$\frac{100}{100}$
128ff, 238, 243, 244, 370	semigroup 1ff
n-370, 403	adjoint - 16ff, 77, 400
strict - 119, 119, 120, 238, 242, 310, 316	${ m analytic} - 83 \! f \! f \ { m bounded} - 3$
predual 369	bounded -3 bounded holomorphic (of angle α) –
projection 73, 209ff, 343ff,	83ff, 110
410ff, 433	compact $-40ff$
$\frac{410}{10}$, $\frac{430}{10}$ ergodic – $\frac{410}{10}$, $\frac{434}{10}$	commuting -24
recurrent -407	contraction -3 , $47ff$, $247ff$,
semigroup –	287f, 337
209ff, 310, 343ff, 411	convolution – 12
spectral - 66ff	differentiable – $37f$, 41
pseudo-resolvent 209ff, 314ff,	diffusion – 11ff
372ff, 383ff, 392ff, 419ff	$\frac{1}{2}$ disjointness preserving – 291ff
positive $-239ff$	eventually compact –
	40ff, 209, 211, 214
	eventually differentiable -37 , 41
	eventually norm continuous –
quasi-compact $214ff$, $343f$	38ff, 41, 87ff, 106, 178, 304f,
quasi-interior point 238, 306	310, 337, 345
	F-product – 20f, 74ff, 192
	holomorphic (of angle α) – 83ff, 41,
	100, 163, 305ff, 311ff
11.1 756 4146 010 080	identity preserving – 370ff, 379ff,
range condition 55f, 146f, 249, 270	383ff, 408ff, 424f
regular mapping 242, 272, 279f	implemented -403
regularity 342, 273, 279f	induced - 14f, 74ff, 298, 374
residue 67f, 72ff, 308ff, 385ff resolvent 63ff, 370	$egin{aligned} & ext{irreducible} - ext{182ff}, ext{ 210}, ext{ 315ff}, \ & ext{336ff}, ext{ 406ff} \end{aligned}$
compact - 40, 73, 130, 166,	lattice homomorphism $-136ff$, $143ff$,
177, 305, 316, 336	192ff, 235, 320ff
positive – 133ff	192]], 253, 320]] Markovian – 144ff, 191
pseudo – 299ff, 314ff, 372ff,	$\mathbf{matrix} = 7$ $\mathbf{matrix} = 7$
383ff, 392ff, 419ff	mean-ergodic -346
slowly growing $-301ff$	modulus – 278ff, 282ff
resolvent 6, 63ff, 370	multiplication $-7f$, $42ff$, $65f$, $287ff$
, ,	2 07 07 07
